HEATED TOWEL RAILS

CUBIC COLLECTION

USE LESS WATER, SAVE ON ELECTRICITY

Bathroom Butler heated towel rails use Dry Element Technology or DET which ensures quicker heat up times, reaching optimum temperature within 10min. With the wattage of the average size heated rail being the same as a single light bulb, they don't cost much to run either.

This range is also available in a polished POLS or a brushed BRSH finish. Bathroom Butler reserves the right to alter and/or remove designs from time to time without prior notice.

Every detail well considered. Our products are made from one of the finest grades Stainless Steel, combined with flawless design. Meticulous engineering and years of perfecting resulted in the most effective bathroom accessories imaginable turning your bathroom into a space worth showing off.

Made from GRADE 304 Stainless Steel and hand polished to a mirror finish, our products will neither rust nor flake thanks to the inherent corrosion resistance properties of GRADE 304 Stainless Steel.

No More Loose Accessories. With our unique RIGID Loc Mounting System our bathroom accessories remain securely fitted on the wall.

The surface finish of all colour components (including PVD and other coating methods) of Bathroom Butler bathroom accessories with RIGID Loc Mounting system, are guaranteed against manufacturing defects for a period of ONE year from date of purchase.
