COMPANY
PROFILE

2022

UNLIMITED WORLDS

“I always look to the future with confidence, since it is the forward progression of our experiences. 2022 is an important milestone for us as it represents the tangible result of our hard work over the past ten years, building the Frascio brand to achieve what we envisioned: a small but growing Italian company, highly skilled and reliable, producing handles destined for all over the world.”

Massimo Soldi
CEO Frascio srl

CONNECTIONS AND RELATIONSHIPS WORLDWIDE

Handles are a functional architectural element that link together the door structure and interior design of a project. Thanks to Frascio's strong history,

technology and research into the needs of the future, we are able to satisfy the ever-changing requests of architects and interior designers with originality and innovation.

KNOWING FRASCIO

Our products, designers, technology, values and history all converge to define Frascio as an innovative company that appreciates the value of our loyal men and women as we face the future together as a team.

HERITAGE

Frascio's history demonstrates how the company has been ahead of its time, willing to evolve and reinvent itself to stay relevant and to keep looking to the future with passion and inspiration.

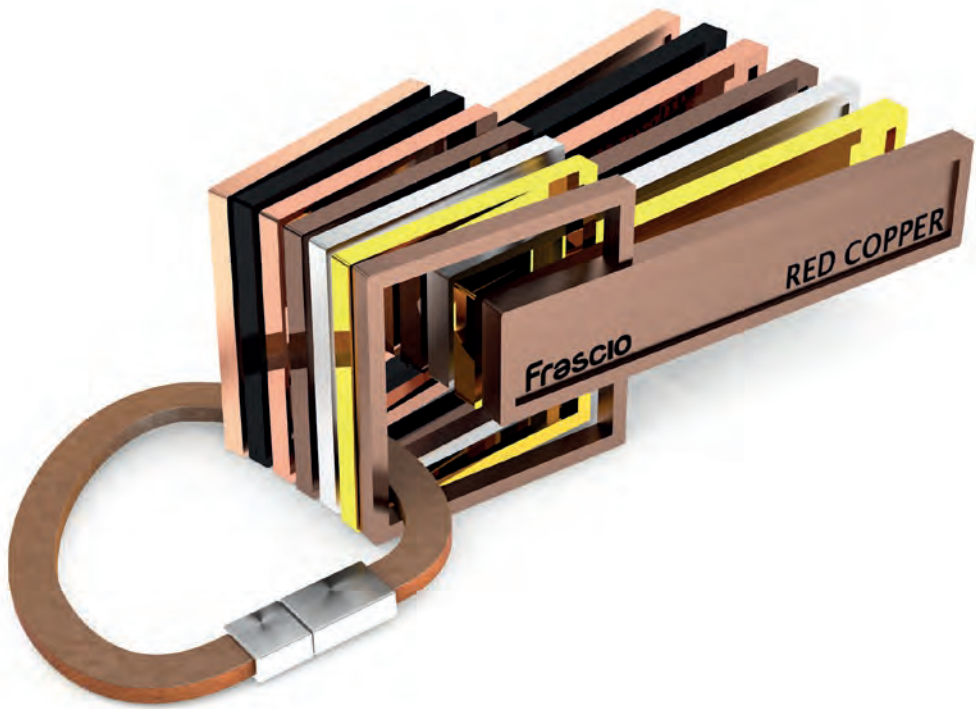

Founded in 1945 as an artisanal workshop, a new era began in 2012 under the leadership of Massimo Soldi, who undertook the challenge to revolutionize Frascio's approach to the market, with forward thinking ideas, a fresh treatment of product lines, and careful attention to details.

Today the brand succeeds in the lever handle market with original solutions, and a business with the capacity to take on the challenges of the future.

TECHNOLOGY AND INNOVATION

Certified PVD technology leads
the industry.

PVD FINISH

Frascio demonstrated industry leadership by being the first to introduce the world to PVD coatings on lever handles providing previously unseen finish performance. Now with more than 30 years of experience, Frascio's PVD finish options provide lifelong durability without the need for clear coatings, thanks to the

scratchproof hardness of their surfaces. Innoxbrass, Innoxchrome, Innoxbronze, and Anthracite are industry leading finishes, their color tone always in step with modern interior design trends. The company has continuously invested in process and equipment to maintain world class PVD technology and performance.

QUALITY SYSTEM

An introduction by Andrea Mascadri,
chief technician.

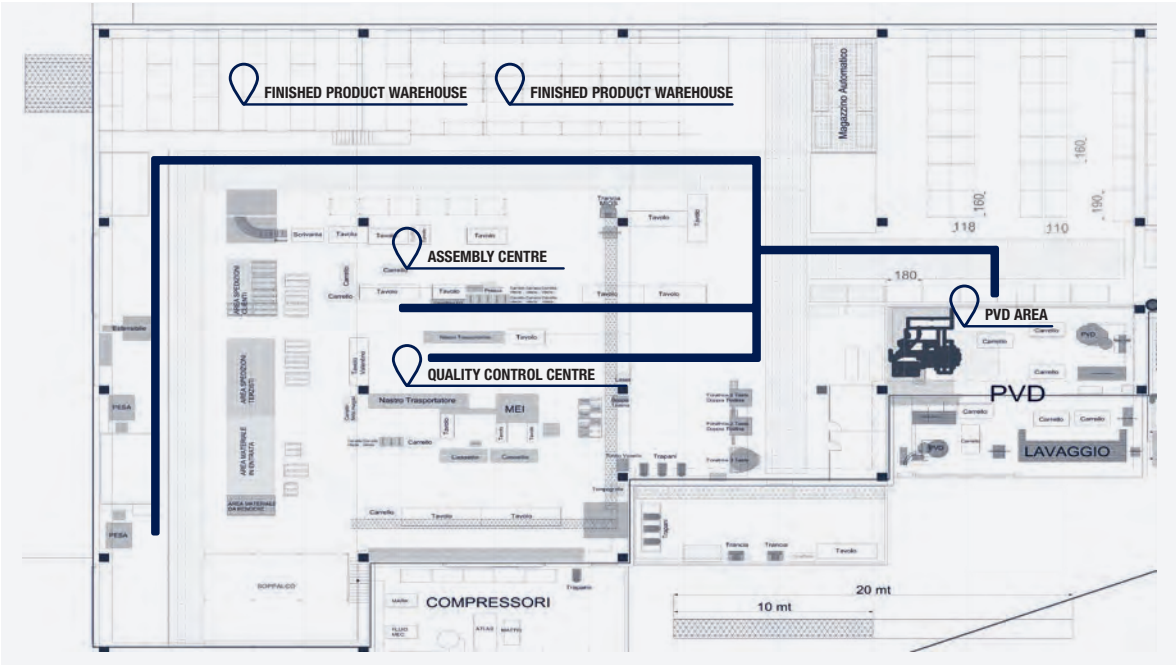

Frascio has always remained
committed to creating high quality
product solutions and ensuring
the highest ongoing performance
levels. We achieve this by showing
great care with each product, as
well as our commitment to using
technology to its fullest potential.

The Frascio brand is certified to
ISO9001:2015 standards, and has
an organization behind it that
carefully regulates production, using
innovative approaches to create a
streamlined yet flexible system to
meet the needs of the market.
Our approach to products is based
in our deep passion for what
we do, and our desire to create
something unique. This passion is
based in our commitment to Italian
craftmanship and creates great
value for our customers.

UNLIMITED WORLDS

THE PRODUCT

The ideal lever handle allows you to enter into the future and explore Unlimited Worlds. The lever handle represents the core of Frascio’s business. To meet the market’s need for variety, a wide range of designs and technical standards are available to satisfy each project’s architectural requirements and design expectations.

TRADITIONAL
mod. SOFT

TREND
mod. BLADE

FUTURITY
mod. BOOMERANG

To better guide our clients in the design selection process, we have divided our design range into the following three categories.

Traditional – our collection of timeless classics.

Trend – these designs tap into architectural style themes with

carefully curated aesthetics and technology.

Futurity – new, innovative shape and function concepts born from research and advanced development that provide solutions for forward-leading design projects or specific applications.

DESIGNERS

Frascio's frequent collaboration with well renowned industrial designers aims to provide a flow of innovative and timely product designs that effectively meet the needs of the market and follow in our authentic spirit of Italian design. Since our foundation, we have collaborated with the best Italian and international designers to create new models that further our success in the market. The recent mention by the ADI Design Index 2020 of the new Boomerang handle as the best Italian design proves the

positive result we achieve through these gratifying collaborations. This ongoing collaboration with the professional design community allows Frascio to be part of the evolution of the lever handle industry as well as to be responsive to the changing needs of the market. Frascio innovation is a clear example of the unmistakable benefit of Made in Italy.

ROBBY CANTARUTTI

Born in 1966, is an architect and industrial designer. He gives shape to functional needs with a clear and simple language. Active as a structural architect and interior designer, his projects suggest a spontaneous dialogue with the environment, enriching and respecting the needs of contemporary living. His work is also influenced by two great passions: architecture and nature.

PAOLO MARTINIG

Was born in 1962, he finished his studies in 1986 and joined the world of communication where he remained active until 1994, working in Milan, Treviso and Udine. The gap between communication and design in his projects is very thin. He has also cooperate with the most well-known Italian fashion brands for the creation of international projects. Today he works for important companies in the furniture and nautical sector.

CDGL

The historical family collaboration born in the '60s, between the architect Caccia Dominioni and the company guided by Bruno Lualdi, is carried on by his sons - Antonio and Ambrogio - to honor the cultural tradition of Italian design. Enrico Gollo has been involved in industrial design for over 20 years, first as a partner of "Piano Design Workshop", then founding the studio "Ergo Design" and collaborating over the years with several companies.

MAURIZIO DURANTI

Was born in Florence in 1949. He graduated at Genova Architecture University in 1976 and ran his own studio until 1987, the year he moved to Milan. He's dealt with architecture but his main focus has been industrial design, designing products for numerous home furnishing companies, some of which have been exhibited in various museum collections. He has also designed showrooms, stores and exhibitions and has often been published in the national and foreign press.

GIACOMO GIUSTIZIERI

Tuscan designer, he combines his technical training in mechanical engineering with the creativity acquired during his degree in industrial design. He has had many years of immersive experience collaborating on projects in various fields: naval, automotive, lighting and glass components and accessories. At the same time he takes care of events that promote the Italian language and culture across the world and he is specialized in "design for all" to help the disabled.

MASSIMO FARINATTI

Graduated in architecture and began his professional career working as a freelancer in prominent studios and ateliers in Milan's creative reality. In 1985 he founded the studio "Triplano associati" and in 1997 the own studio "Farinatti design". Over the years he has focused his activity on architecture, communication, design and art direction. His projects are supported by a rigorous methodological basis and a solid vision of resources and available technologies.

SIMONE MICHELI

Founded the homonymous "Studio d'Architettura" in 1990 and in 2003 the design company "Simone Micheli Architectural Hero" located in Florence and Milan. His professional activity ranges enormously: from architecture to interior architecture, from design to visual design, passing through communication. His creations - sustainable and always environmentally conscious - are characterized by a strong identity and uniqueness.

ROBERTO SEMPRINI

Born in Rimini in 1959, he studied architecture in Florence. In 1987 he joined Bolidist, the movement that expresses design in a symbolic way and as a synthesis of the concept of electronic speed. After moving to Milan, he began working as a freelance journalist for several design magazines. In 2000 he moved to Rimini, where he opened "RM 12 art & design", an art gallery and interior design and architecture studio. Today he teaches at the Brera Academy of Fine Arts.

BRIAN SIRONI

Born in Seregno (MI) in 1977, he graduated in Design at the Milan Polytechnic and continued his education by working with architects and designers. His educational path took place in the heart of Brianza, a mix between the artisanal and the academic, with strong roots to the territory, an integral part of his projects as an Italian and cosmopolitan designer. In January 2008 he founded his own studio.

ADRIAN E JEREMY WRIGHT

"Design Wright" is the London-based studio of Wright Brothers, Adrian and Jeremy. Specialising in interior design and accessories, thanks to a background in engineering, they capture all the visual and technical aspects of the products they make. A small laboratory of ideas, with a strong character, ranging in various disciplines without any limits.

FRASCIO IN THE WORLD

Frascio proudly offers its professional design range to satisfy demands from all over the world, providing technical standards, finishes, and design solutions that meet the needs of the local market.

The presence of Frascio's handles in architectural works, that every year grows larger and larger, are proof of a reliability and a service that can comply even with the most demanding requests.
